Free Video Cutter Expert is a free and powerful video cutting software application to cut a video into segments with millisecond precision.

With this powerful program, you can cut videos into one or more clips and remove undesired parts such as trailer or advertisements.

It supports almost all popular video formats such as MP4, WMV, FLV, AVI, MPEG, MOV, MKV, 3GP, SWF and VOB.

You can specify which parts of the video to include or which parts to exclude.

Also, the videos can be split easily into equal length parts or be split by time.
A fade-in and fade-out effect can also be applied on each one of the clips or for the whole video clip.

It has a storyboard and a built-in video player that enables preview of the original video and output file with highly accurate millisecond precision.

Free Video Cutter Expert helps you also to share or backup large video files because you can split them into smaller ones that are easy to upload and store.

It is very easy to use and fast. No need to wait for importing video files. Just drag and drop the video file and specify easily the start and end points of the video clips with high accuracy.

You can also convert the input video file into another format and the output video segments can be joined or you can cut the video into separate video files.

Also Free Video Cutter Expert can auto-shutdown the computer, sleep, hibernate, logoff e.t.c. or explore the output video file when the cut process is done.

Moreover, you can easily pause the cut process and resume it afterwards again or stop it.

The application is multilingual and translated into 38 different languages.

Audio Converter 4dots is a powerful, multilingual mp3 converter and audio converter.

Supports 15 audio formats and 10 video formats. Convert FLAC to MP3, M4A to MP3, AAC to MP3, WAV to MP3, MP3 to WAV, OGG to MP3, MP3 to FLAC, MP4 to MP3, Video to MP3 e.t.c. and vice versa.

Includes MP3 cutter and audio cutter that displays the waveform of the audio and has preview and can cut MP3 and other audio files with millisecond precision.

Also it includes a MP3 joiner and an audio joiner for other audio formats.

You can also easily rip CDs with Audio Converter 4dots.
4dots Software
software for your needs

You can edit metadata for each mp3 file, or for all audio files and also copy album art from source, or set new album art for the audio file.

Audio Converter 4dots has an in-built media player that can play the original and also the converted audio file.

Can extract audio from video files (AVI, MP4, MPEG, MPG, MOV, MKV, FLV, WMV, 3GP, VOB, SWF formats supported) and converted them to your desired audio format type.

This is useful to extract audio from movies, video clips e.t.c.

With Audio Converter 4dots you can convert an audio file into a format that is supported by a mobile device or to reduce the size of an audio file, for example to convert a WAV file to MP3.

You can even set the sampling rate, bitrate, encoding mode (cbr, vbr), volume and metadata.

Audio Converter 4dots is very to use. Simply add the audio files to convert, select the target audio format and quality profile and then press the "Convert" button.

Additionally, Audio Converter 4dots can also sort the selected audio files based on filename, duration, file size, bit rate, sampling rate e.t.c. and also based on metadata tag names.

If the song name or filename starts with the number of the track then it will get sorted in the correct order. This means that the song with track number 10 will be placed after song with track number track 9 and not after song with track number 1 e.t.c. which would be normal for simple word sorting.

Moreover a feature that other programs do not have and Audio Converter 4dots has, is that you can also specify sophisticated encoder parameters for each format such as parameters ABR, use joint stereo for MP3 format.

It has in-built target quality profiles but you can also add your own.

Audio input files can be easily added also with a drag and drop from Windows Explorer.
4dots Software
software for your needs
You can also easily import M3U, M3U8, PLS, XSPF, ASX, TXT, CSV format type playlists.

Converted audio files can be automatically normalized and fade-in and fade-out effects can be applied on the audio files.

Moreover, you can also easily apply audio effects such as tempo, flanger, phaser, echo, highpass, lowpass e.t.c.

You can also mute left or right stereo channel or switch stereo channels of the audio files.

When conversion is finished the application can auto shutdown the computer, hibernate, sleep, exit e.t.c.

Audio Converter 4dots is multilingual and translated into 38 different languages.

Supported Input Audio Formats : MP3, FLAC, M4A, WMA, AIFF, AAC, WAV, WavPack, Monkey's Audio (APE), MusePack, OPUS, OGG, AC3, AMR, MP2, AU.

Free File Unlocker is an essential freeware to delete currently used, locked, undeletable, busy files that works with all 32bit and 64bit versions of Windows and Windows Server.

It unlocks files or folders and stops the following error messages from appearing when trying to delete, move and rename files that are in use by other programmes:

- Cannot delete folder: It is being used by another person or program
- Make sure the disk is not full or write-protected and that the file is not currently in use
- Cannot delete file: Access is denied
- The file is in use by another program or user
- There has been a sharing violation
- The source or destination file may be in use
- Cannot read from the source file or disk

It can also be used to terminate malware that is difficult to be removed and kill viruses and trojans.

In case the locked file is a process module (dll etc.) it does unload it and unlocks the
In case a delete, rename or move action does not succeed it is scheduled for the next Windows Reboot.

It is fully integrated with Windows Explorer and a simple right mouse click unlocks the file or folder.

Additional information about the processes locking the file is also shown and the processes or file handle can be killed and deleted.

Free File Unlocker can also be executed from the command line and has the ability to provide locked file input lists, copy destination lists, move destination lists and rename lists.

Empty Folder Cleaner is a free advanced utility to delete empty folders from your computer and remove the clutter in order to increase performance.

Removing empty folders that are empty, or do contain only empty subfolders, or junk files, will increase the speed of file searches and the overall performance of your computer.

The folders to be scanned can be specified and the empty folders that are found are displayed in a tree and a list structure.

Only selected empty folders of the empty folder scan result are deleted.

Backup files of the folders that are deleted can be kept and each deletion can be undone.

The user can specify filenames that will be considered as junk files using wildcards and
4dots Software
software for your needs

regular expressions.

Also, it is possible to specify protected folders, protected files and folders to ignore using wildcards and regular expressions.

Folders that are empty and have empty subfolders are considered as empty. Also, folders that have files of zero file size or include only files that were specified junk files (e.g. thumbs.db, desktop.ini) are considered as empty.

The empty folders that are being deleted, can be deleted permanently, deleted to the recycle bin or can be stored as a backup compressed in a zip file.

Also, the application unlocks folders and files that are currently in use before attempting to delete them using the Free File Unlocker engine. Therefore it is not necessary to use another application in order to delete folders with files that are in use and locked.

The maximum folder scan depth can also be set and the option to always delete the files using administrator privileges.

Empty Folder Cleaner is translated into 38 different major languages.

The application is fully integrated into the Windows shell and folders can be selected and scanned using a right mouse click in Windows Explorer.

This **html validator** is perfect to **find out HTML errors on websites and batch check the markup validity of multiple URLs in HTML, XHTML or HTML5**.

Using an **html validator** like this one can save you time and money and help you to see what URLs are in need of change and which are valid.

Search up an **unlimited number of different URLs or files quickly** so you can see which need to be fixed and improve your SEO. A report file for later use can be saved.

The **errors are being highlighted and listed in an editor** for your convenience and in order to save time making the required changes.

The **checks are being made using the original w3c validator program but locally, without using the W3C website**.

You can import a list of URLs or files to check from a Text file, an Excel file, a CSV file, a XML sitemap file or simply enter them in a textbox.

The application is also **multilingual and translated into 39 different languages**.

One of the most important guidelines of onpage SEO (search-engine-optimization) and in order for your webpage to load faster is that you use CSS Image Sprites for your webpage's images.

This means that you do not insert a lot of images in your HTML code but combine them into one and you display them with proper CSS code.

By using CSS Sprites you reduce significantly the dns queries and file queries when your webpage is being loaded by just the one of your combined CSS Sprites image.

This results into faster loading times and search engines prefer webpages that load fast!

With CSS Sprites Generator from 4dots Software you can easily generate CSS Sprites with just a few mouse clicks!

This free tool will generate both the combined CSS Sprites image and the CSS, HTML code that is required.

You can also save your work as a project and open it later.

Free source code is also available.

Gone are the times when physical, analog or digital watches, were the ultimate means to measure time. Thankfully, the World Wide Web offers the unique opportunity to keep time in a punctual and even customizable manner. Coolonlinetimer.com, the website that was recently launched by leading software firm 4dots Software, is a free, customizable online timer and stopwatch, featuring an array of intricate fonts and colors.

At 4dots, we aim to provide software solutions that address common needs. Coolonlinetimer.com was developed after careful planning and deliberation, to cover a broad range of activities. Users can set a timer or an alarm; a from/to date countdown; a counter; select an hourglass feature, and much more—said Mr. Peter Dodson, 4dots Software’s media representative.

He continued, Coolonlinetimer.com is fully customizable, as users can either select a predefined display style, or create their own. Clock customization entails having the option to choose between all the available Google fonts, as well as define the clock’s text and background color, and the page’s background color, too. What’s more, users can even set one of their own images as the clock’s background, either through providing a URL to the image, or uploading it from a local file. The same applies for

sounds – anyone using Coolonlinetimer.com has the ability to choose their own local alarm sound file, image or video.

In addition to its highly popular countdown feature, Coolonlinetimer.com also features a cash clock, basket counter, soccer counter, chess timer, chess clock, analog timer and analog chess clock options.

Coolonlinetimer.com is currently available in eight languages (English, German, French, Spanish, Portuguese, Italian, Chinese, Japanese and Russian), while the company has shared its plans of making it available in several other languages, in the near future.
cssspritestool.com is an easy to use CSS sprites generator tool. CSS Sprites are useful for SEO purposes and for website performance improvement.

cssspritestool.com is unique because it allows the user to load and save projects and reuse the user's work and css sprites another time later.

Simply, the user has to drag and drop images (png, gif, jpg images) and then press on the "Generate CSS Sprite" button to generate the css sprite. Then the combined sprite image will be generated and displayed to the user and also the required css and html code to use it on the user's site. The user has to copy and paste this code to his site and download and add the generated image to his site.

To download the generated files directly as a zip archive, the user can press on the "Download Zip Package" button.

If the user presses on the "Download Zip Package" button then the zip archive contains a
file called "Project.cssproj.zip". This is the project file and the user can use it to reuse his work later.

To open a project the user has to simply drag and drop the "Project.cssproj.zip" file and then press on the "Open Project" button that will appear.

The user can also set the padding between the images of the sprite, the alignment of the sprite (horizontal or vertical) and also the css class prefix. Also, the user can set the desired sprite image type (png, gif or jpg).

Maximum Image Size : 25MB

Maximum Number of Images: 200

Time till sprite image Files get Deleted: 1 day
